

UPUTE ZA INSTALACIJU PLUG-IN PROGRAMA CORTONA3D

Interaktivni 3D prikazi naših ponuda najkorektnije će raditi ako koristite *Windows Internet Explorer* 8 pretraživač. Iako se CORTONA3D može dodati i nekim drugim pretraživačima (*Opera, Mozilla Firefox...*), česti su problemi s teksturama.

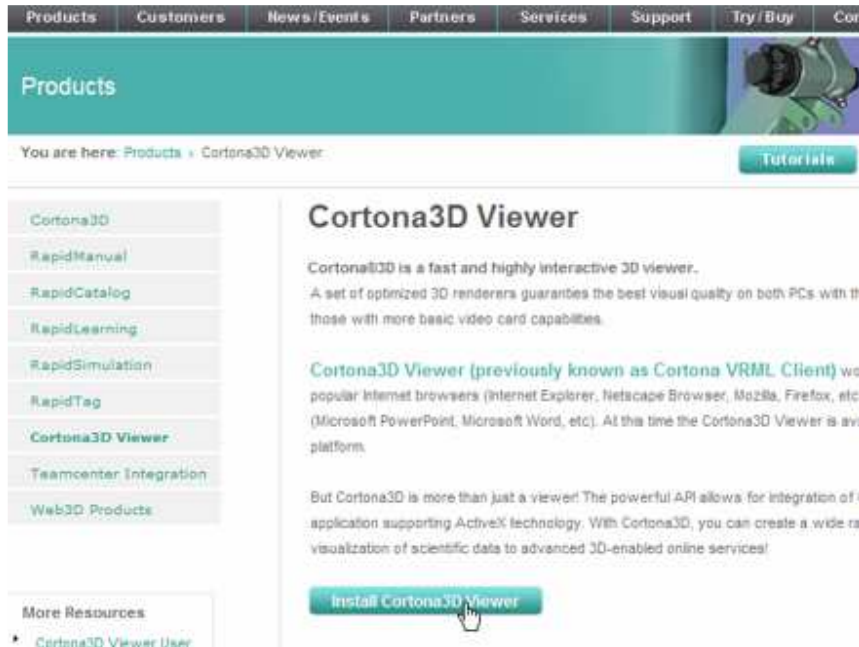

Ako Interaktivni 3D prikaz bilo koje ponude pokušate pokrenuti bez CORTONA3D dodatka, dogodit će se ovo:

Internet explorer ne prepoznaje datoteku *Ponuda4.wrz*, pa Vas pita želite li tu datoteku spremiti na disk ili tražiti program kojim biste ju otvorili. Dakako, ne želite ni jedno ni drugo, pa kliknite **Cancel**. Potom kliknite ponuđeni link za CORTONA3D:

Otvorit će se novi prozor i u njemu stranica cortona3d.com/cortona. Kliknite link **Install Cortona3D Viewer**:

The screenshot shows the Cortona3D website's product page for the Cortona3D Viewer. The navigation menu at the top includes: Products, Customers, News/Events, Partners, Services, Support, Try/Buy, and Contact. The main header features the word 'Products' and a 3D camera icon. Below the header, a breadcrumb trail reads 'You are here: Products > Cortona3D Viewer'. A sidebar on the left lists various product categories, with 'Cortona3D Viewer' highlighted. The main content area is titled 'Cortona3D Viewer' and contains the following text:

Cortona3D is a fast and highly interactive 3D viewer. A set of optimized 3D renderers guarantees the best visual quality on both PCs with the those with more basic video card capabilities.

Cortona3D Viewer (previously known as Cortona VRML Client) works in popular Internet browsers (Internet Explorer, Netscape Browser, Mozilla, Firefox, etc.) (Microsoft PowerPoint, Microsoft Word, etc.). At this time the Cortona3D Viewer is available on a Java platform.

But Cortona3D is more than just a viewer! The powerful API allows for integration of C++ applications supporting ActiveX technology. With Cortona3D, you can create a wide range of visualization of scientific data to advanced 3D-enabled online services!

At the bottom of the main content area, there is a prominent green button labeled 'Install Cortona3D Viewer' with a mouse cursor hovering over it.

Na sljedećoj stranici kliknite link **Download**:

The screenshot shows the Cortona3D website's 'Install for Windows' page. The navigation menu at the top includes: Products, Customers, News/Events, Partners, Services, Support, Try/Buy, and Contact. The main header features the Cortona3D logo and the tagline 'Automating Technical Communications'. Below the header, a breadcrumb trail reads 'You are here: Products > Cortona3D Viewer'. A sidebar on the left lists various product categories, with 'Cortona3D Viewer' highlighted. The main content area is titled 'Install for Windows' and contains the following information:

[Download](#)

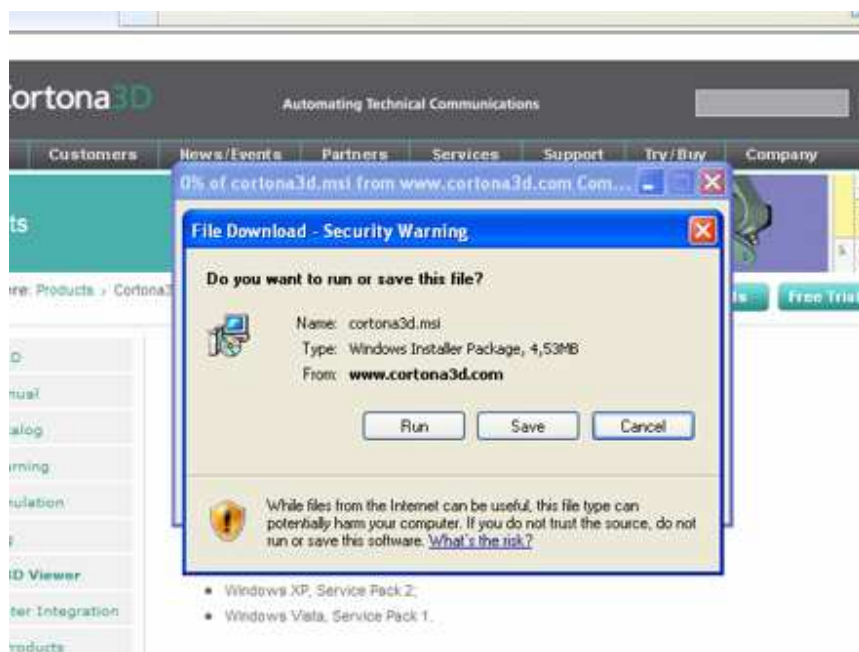

File size: 4.53 MB

Operating system:

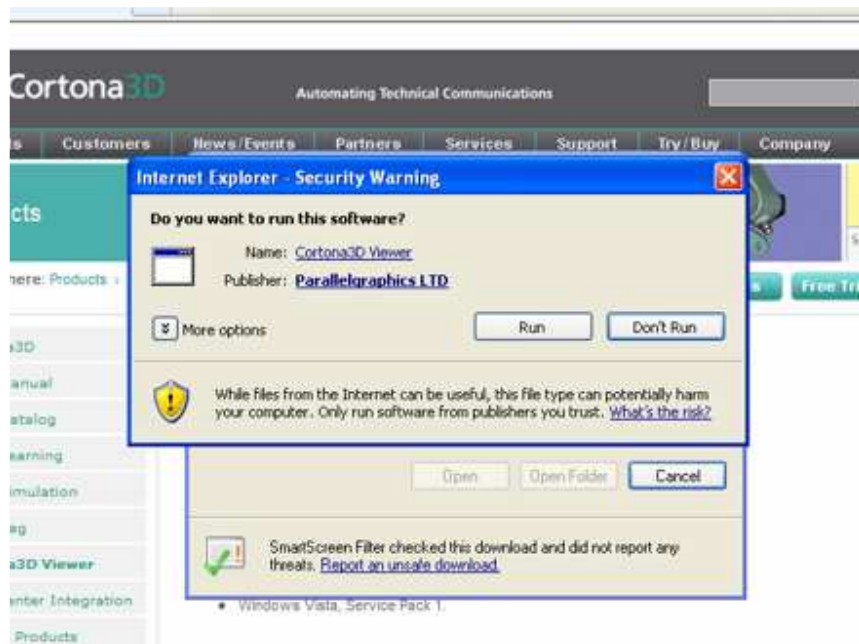

- Windows 2000, Service Pack 4;
- Windows XP, Service Pack 2;

At the top of the page, there is a 'Help' button and a search bar.

Otvorit će se novi prozor s pitanjem:

Želite li pokrenuti ili spremiti ovu datoteku? Budući da Vam datoteka s programom nije potrebna na disku, kliknite gumb **Run**. Ovisno o tome kako su podešeni Security parametri u Vašem Internet Exploreru, vjerojatno će se pojaviti ovakvo upozorenje:

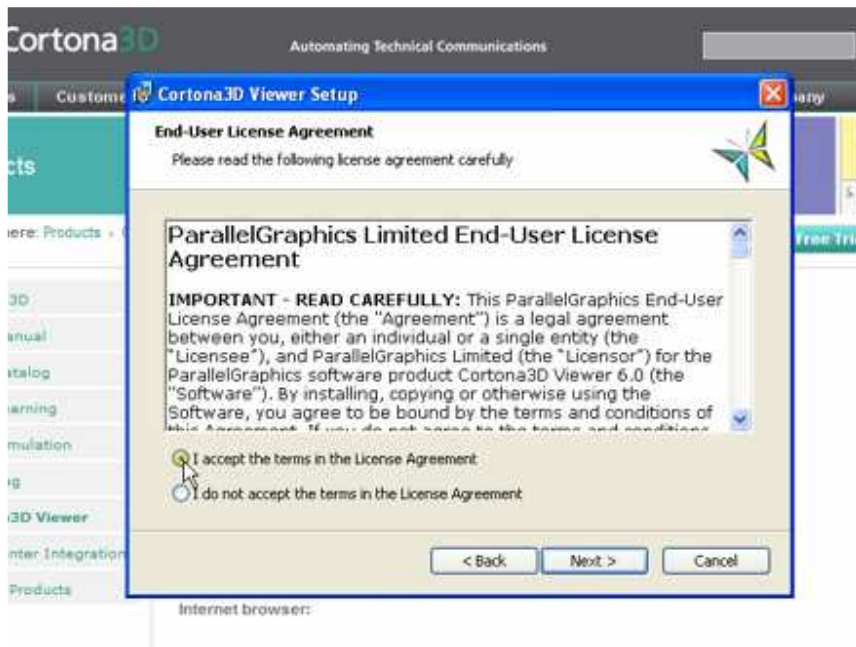

Internet Explorer je, kao i većina današnjih pretraživača, vrlo oprezan prilikom otvaranja datoteka s programima koji se mogu pokretati. Sve takve datoteke Explorer će okarakterizirati kao datoteke koje mogu naštetiti Vašem računalu, pa Vas ovako upozorava da ovaj program pokrenete samo u slučaju da vjerujete stranici s koje se program pokreće. Budući da ovdje svakako nije riječ o virusu, "trojancu" ili nekom takvom zločestom programu, kliknite **Run**.

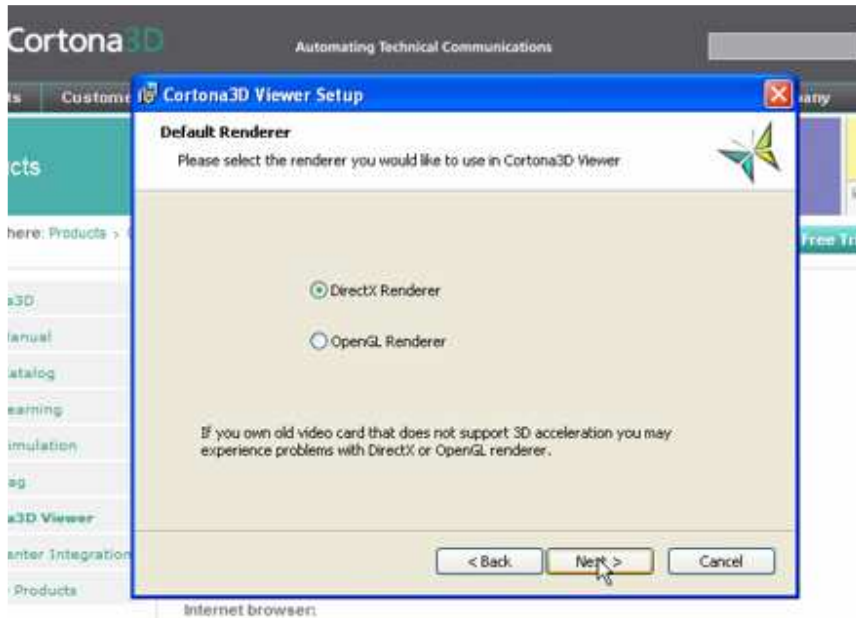

Da je instaliranje programa uspješno pokrenuto, pokazat će Vam sljedeći prozor:

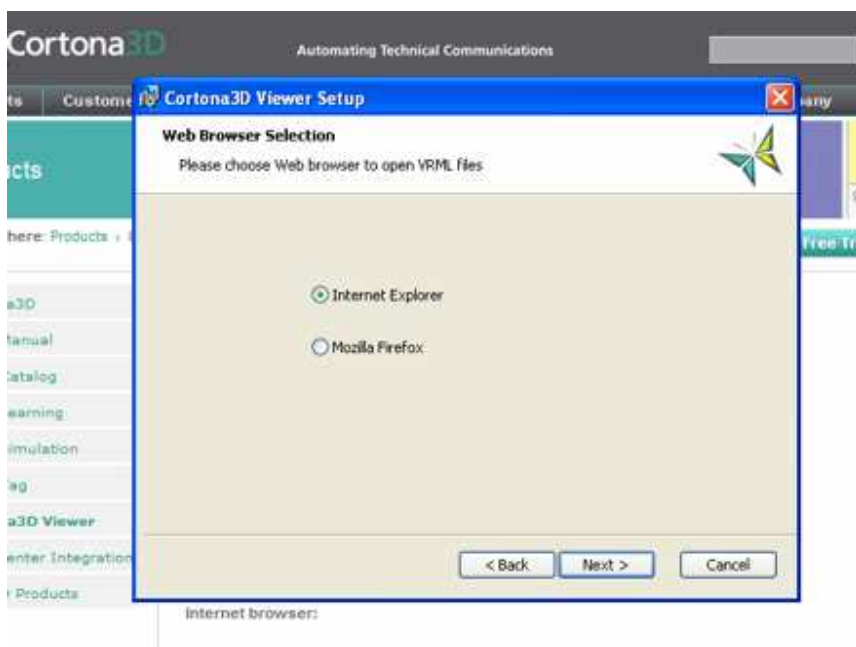

Kliknite **Next>**, pa na sljedećem prozoru odaberite **I accept the terms in the License Agreement** (prihvaćate uvjete preuzimanja licenciranog programa). Ponovno kliknite **Next>**:

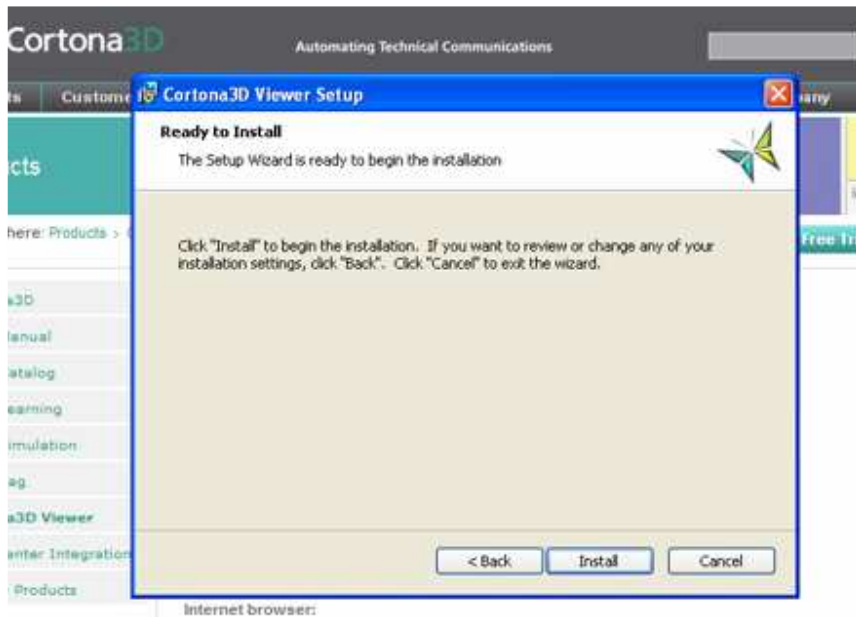

Sljedeći korak je određivanje skupine grafičkih funkcija kojima se koristi Vaše računalo prilikom crtanja 3D objekata. To je vrlo vjerojatno **DirectX Render**. Točnije, ako ne znate koji grafički render koristite, onda je to sigurno **DirectX**. Ponovno kliknite **Next>**.

Ako se na Vašem računalu instalirano više pretraživača (kao što je slučaj na ovome laptopu), CORTONA ih detektira i pita Vas za koji pretraživač želite da se "zalijepi". Rekli smo već da VRML format najispravnije radi s Internet Explorerom. Označite **Internet Explorer** i kliknite **Next>**:

Kliknite **Install**:

Na posljednjem prozoru isključite kvačice **View readme file** i **View a sample VRML scene in Cortona3D Viewer**, pa potom kliknite **Finish**:

Instalacija je uspješno završena. Možete zatvoriti Cortona3D prozor i nastaviti s pregledavanjem naših stranica. **Interaktivni 3D prikazi** bi sada trebali ispravno raditi.
